What do I have to do?

The Audiologist will greet you and take you into one of the test rooms.

You don't need to do anything. Just keep still and quiet.

Someone will look in your ears first to check they are clear.

The test is checking the middle part of your ear and making sure it is working properly.

A soft ear tip and probe will be placed in your ears.

The test will take about **5 minutes** to complete.

You may hear some buzzing sounds and feel some pressure in your ear.
