

DPIA Reference	DPIA1275
DPIA Title	PETCT Referral Data
Summary of Proposal This is provided to Information Governance Steering Group and Safety and Risk as an overview of the project. It is also published on the website and should provide the public with an understanding of the information asset and how data is protected as a standalone statement.	Introduce bi-directional HL7 interfaces between existing Trust CRIS and (AML) Care Pathway Manager (CPM), to reduce clinical risk, effort and delays arising from manual transfer (copy and paste or double-keying) of data from Trust CRIS to CPM and vice-versa. The change doesn't result in new information being collected or processed, but a new way of communicating it between the two systems.
Date Ratified	23 May 2022
