### Pocket guide to LGBTQ mental health : understanding the spectrum of gender and sexuality By Petros Levounis & Eric Yarbrough

The Pocket Guide to LGBTQ Mental Health is a down-to-earth, informative, and affirming manual for mental health clinicians working with patients of diverse gender and sexual identities. In recent years, people have begun to grapple with these issues in a healthier, more public way, and mental health practitioners must be prepared to meet their patients with the knowledge, understanding, and grasp of the context in which patients live their lives. The editors have brought their specialised knowledge to the project and, along with contributors who are experts in the field of LGBTQ mental health, have created a book of uncommon empathy. The writers have drawn on both the scientific literature and their own clinical experience to create a volume that is informative, practical, and easy to read.

### **Non-binary lives : an anthology of intersecting identities** By Jos Twist, Meg-John Barker, Kat Gupta, Benjamin Vincent

What does it mean to be non-binary in the 21st Century? Our gender identity is impacted by our personal histories; the cultures, communities and countries we are born into; and the places we go and the people we meet. But the representation of contemporary non-binary identities has been limited, until now. Pushing the narrative around non-binary identities further than ever before, this powerful collection of essays represents the breadth of non-binary lives, across the boundaries of race, class, age, sexuality, faith and more. Leading non-binary people share stories of their intersecting lives; how it feels to be non-binary and neurodiverse, the challenges of being a non-binary pregnant person, what it means to be non-binary within the Quaker community, the joy of reaching gender euphoria. This thought-provoking anthology shows that there is no right or wrong way to be non-binary.
