Royal Devon & Exeter NHS Foundation Trust	
Data Protection Impact Assessment Toolkit	**Version: 6**

DPIA Reference	*DPIA1123*
DPIA Title	Care Everywhere DPIA
Summary of Proposal This is provided to Information Governance Steering Group and Safety and Risk as an overview of the project. It is also published on the website and should provide the public with an understanding of the information asset and how data is protected as a standalone statement.	Care Everywhere will help the organisation improve continuity of care for its patients who are seen at other healthcare organisations that are using Epic. It facilitates the secure exchange of patient records with outside healthcare organisations directly involved in an individual patient's care and treatment. Sharing of data wil be in line with established Trust policy and UK GDPR 2018. For non UK Epic hospitals, consent will be required for each episode of data sharing and the request will be submitted with consent and patient ID to the organisation Information Governance office. Initially this capability will only be with organisations using Epic but there is potential to link to Health Information Exchanges which incorporate organisations using other IT suppliers. This DPIA does not cover the sharing of data with non EPic hospitals and must be reviewed prior to linking with any HIE.
Date Ratified	02 August 2022
