

DPIA Reference	DPIA1069
DPIA Title	My Care Trial Data Loads MPI Load
Summary of Proposal This is provided to Information Governance Steering Group and Safety and Risk as an overview of the project. It is also published on the website and should provide the public with an understanding of the information asset and how data is protected as a standalone statement.	<p>The My Care programme is due to replace a number of NDHT's core systems during 2022. This DPIA covers the trial loads of data into copies of the RDE's production Epic instance. These trial loads must be into copies of the production instance so that we can understand both the data being loaded and its impact on the existing production systems. The data loads are used to develop load processes, test, analyse, report on and plan the cleansing of the data to be loaded into the system as part of the implementation of Epic.</p> <p>This DPIA does not cover any loads into the new Haemoetics SafeTraceTX Blood LIMS.</p>
Date Ratified	23 May 2022
