

Request title:  
Structured Judgment Reviews (SJRs) & Covid-19

---

Reference Number: F2980  
Date of Response: 01/11/2023

Information requested from 1st January 2020 – to 26/03/2021- RDUH Wonford hospital.

1. Please can you tell me how many Structured Judgment Reviews (SJRs) the trust has carried out since 1st January 2020. For deaths occurring in RDUH hospital, the total SJRs completed between 01/01/20 to 26/03/21, overall completed: 354.
2. Of these, total where Hospital Acquired COVID-19 was indicated, and COVID-19 Acquisition was 'Probable' or 'Definite': \*54  
\*NB: Please be advised, as per the text of the question above, this is number of SJRs involving a patient with hospital acquired COVID-19 at time of death, not necessarily that COVID-19 was a Cause of Death.
3. If the trust does not use the SJR method, please can you give me the numbers for the equivalent method you use e.g. a Serious Incident. This question is not applicable.
4. What was the outcome of the SJRs (or SIs, if the SJR system is not used)? please give a summary of outcome e.g. any processes that were changed, any conclusion as to what went wrong). Please see published report here:
