

Follow-Up Appointments

Reference Number: RDF1739-23

Date of Response: xx/xx/23

Further to your Freedom of Information Act request, please find the Trust's response(s) below:

Please be aware that the Royal Devon University Healthcare NHS Foundation Trust (Royal Devon) has existed since 1st April 2022 following the integration of the Northern Devon Healthcare NHS Trust (known as Northern Services) and the Royal Devon and Exeter NHS Foundation Trust (known as Eastern Services).

- 1) The number of patients waiting for a follow up appointment in your trust that were not captured in the official Referral to Treatment monthly statistics in the following months: May 2019, May 2022 and May 2023.
- 2) Please break this information down by:
 - a. Treatment function.
 - b. Month and year patients were placed on a follow up appointment list.
 - c. Month and year of due date for patients to be seen. If due dates are not in place, please state this by volume.

Please see Trust response attached .

Please note:

For Q1a) The number of patients waiting for a follow up appointment in your trust that were not captured in the official Referral to Treatment monthly statistics (we have supplied number of appts) - split by Treatment function code

In May 2022 & 2023 and we have used the WLMDS – waiting list minimum data set (which is available in the public domain) for number of follow up appts on waiting list as at closest to the month end of May for each year

However Q2b) and 2c) is not available in the WLMDS so we are unable to report this information.

The figures we have reported differ by a reasonable amount between 2022 and 2023 and this is possibly due to the merging of the two trusts and new Electronic patient record system causing DQ issues and/ or that we were seeing more first or follow up depending on the area that needed the most attention for reducing patient waits.

Data for 2019 is not comparable to 2022 and 2023 or by site as it comes from different legacy systems and does not follow the same criteria as WLMDS. This was

used for internal reporting purposes only and may not entirely capture the same information.

Please also note when indicated:

Section 40 (2) - Less than five

In accordance with Section 40 (2) of the Freedom of Information Act 2000, we are unable to provide figures where the number of patients is less than or equal to five and could risk the identification of those patients and breach Caldicott principles. In these cases ≤ 5 is used to indicate that a figure between 1 and 5 is being suppressed.

This follows NHS Digital (formerly HSCIC) analysis guidance (2014) which states that small numbers within local authorities, wards, postcode districts, CCG's providers and Trusts may allow identification of patients and should not be published.

FOI RDF1739 - Joint response please - 1) The number of patients waiting for a follow up appointment in your trust that were not captured in the official Referral to Treatment monthly statistics in the following months: May 2019, May 2022 and May 2023. 2) Please break this information down by: a. Treatment function. b. Month and year patients were placed on a follow up appointment list. c. Month and year of due date for patients to be seen. If due dates are not in place, please state this by volume. For the time period: months: May 2019, May 2022 and May 2023.
