

DPIA Reference	DPIA1124
DPIA Title	MyCare - Storage of patient Wi-Fi data (password)
	<p>This DPIA proposes the potential ability to use a patient's home Wi-Fi due to poor mobile network connectivity therefore enabling the completion of 'live' patient documentation on an electronic device (rather than paper).</p> <p>This assessment lays out the impact on and secure measures required around that patients Wi-Fi information once the data has been stored whether within the Trust mobile electronic device(s).</p> <p>It does not address questions relating to the actual data transferred over the link and its usage, these are addressed in the Home care DPIA.</p> <p>The range of wearable devices utilised on this project have been captured in RD&E Acute Hospital at Home (AHAH) DPIA</p>
