Royal Devon University Healthcare NHS Foundation Trust **Data Protection Impact Assessment Toolkit**	

DPIA Reference	*DPIA1313*
DPIA Title	Mortuary Database Sytem (Eden)
Summary of Proposal This is provided to Information Governance Steering Group and Safety and Risk as an overview of the project. It is also published on the website and should provide the public with an understanding of the information asset and how data is protected as a standalone statement.	The current system used by the Northern Mortuary Service to log the deceased's information and pathway will be closed when our new EPR (Electronic Patient Record) system is implemented. A new mortuary system is therefore required to log and store a deceased patient details and pathway, this includes but is not limited to; recording of activity, cause of death, post mortem results, length of stay. Since both the Northern and Eastern sites have now merged, this need is replicated at Eastern also, where an internally built system is currently in use. **DSPT - Purple Matrix (Z5S7U) Supplier**
